

Hydro-Titan™ Sump Pump

All the advantages of Hydro-Titan in a vertical pump custom built to fit your sump.

FEATURES

Large range to choose from — sizes from 32 mm to 250 mm discharge branch.
 These pumps use standard Hydro-Titan case, cover and impeller. Spares are available off the shelf.
 All metric design — simple to service.
 A wear allowance of 3 mm above designed casing thickness ensures the Hydro-Titan pump will outlast other cast iron pumps.
 Bronze lower and intermediate bearings are lubricated from grease points on the mounting plate.

SPECIAL FEATURES

Various column lengths are available to suit the depth of your sump.
 Various metallurgies are available to resist aggressive liquids being pumped.
 Casing and cover sealing rings are available as an option.
 Impeller wear rings can be supplied as an option.
 Discharge pipe can be flanged to suit your piping needs.
 Features can be incorporated for special purpose applications such as refinery and mining applications.
